Easwaran Subramanian

Berlin, Germany | +49 15141373425 | eashwar-22.github.io | hariharaneaswaran@gmail.com | in/easwaran-subramanian-47ba68141

Data and AI engineer with 3 years of experience building data pipelines, forecasting models and production ML systems. Skilled in Python, SQL, PySpark and cloud-based deployment, with a focus on reproducible workflows and monitoring. Highly fluent in modern AI coding tools and agentic workflows, using them regularly to build things without compromising code quality.

EXPERIENCE

Tübingen Institute for Medical Education, Tübingen, Germany — Nov 2023 - Jul 2024

Data Researcher

- Engineered a validated data pipeline that cleans and aggregates surveys from **200+ professionals**, boosting data integrity and cutting a manual **5-hour process to near zero runtime**.
- Redesigned relational models and optimized SQL queries, **cutting retrieval time by ~50%** for sensitive medical records.

Sony, Stuttgart, Germany — Mar 2023 - Aug 2023

Machine Learning Engineer Intern

- Designed modular Python and PyTorch pipelines for data preprocessing, model training, evaluation and hyperparameter tuning, cutting development time by 2 hours per iteration.
- Contributed to a custom Neural Architecture Search pipeline that **evaluated 20+ model configurations**, helping identify one that **improved performance by ~10%**, supported by unit tests.

Verloop.io, Bengaluru, India — Mar 2022 - Sep 2022

Data Analyst

- Owned the data pipeline automation for a live BI reporting dashboard, **cutting the KPI reporting cycle by ~30%** and ensuring stakeholders had reliable, self-service access to metrics.
- Defined and documented standardized data transformation logic for mapping unstructured inputs to categorical schemas, improving data consistency and downstream **model accuracy (F1 0.78 → 0.85)**.

Tiger Analytics, Chennai, India — Jan 2020 - Nov 2021

Senior Data Analyst

- Built and maintained data models to prepare and validate market, pricing and demand data **across 15+ markets**, enabling stakeholders to make decisions that **reduced analysis turnaround time by ~75%**.
- Developed a pricing model using conjoint analysis, contributing to a reported **10-15% revenue improvement**.
- Automated scenario-evaluation reporting **across 100+ pricing scenarios**, translating complex analytical output into clear revenue/margin/demand insights for business stakeholders.

SKILLS

Languages: Python, SQL, TypeScript, Git, Bash
Frameworks: PySpark, PyTorch, Scikit-learn, Pandas, NumPy, LangGraph, LangChain, PyTest, Pydantic
Databases & Storage: PostgreSQL, MySQL, MongoDB, ElasticSearch
Cloud & Infrastructure: GCP, AWS - Lambda/Athena/Glue, Cloudfare, Snowflake, dbt, Prometheus
MLOPs: Langfuse, Docker, GitHub Actions, CI/CD
Agentic Tools & Harness: n8n, Codex, Claude Code
Languages: English (C1), German (B1), Tamil (Native)

RECENT PROJECTS

- **Hiring Signal Intelligence Platform for Outbound Sales:** Built a GTM intelligence workflow using n8n, Apify and Featherless LLM API to detect sales team expansion and founding sales/GTM roles from public job postings. **Placed 3rd in GTM Hackathon**, Berlin.
- **Quantifying Neural Adaptability:** Replicated the Hypencoder architecture (a neural information retrieval model), using hypernetworks to generate query-specific ranking weights for document scoring. Ran SLURM-orchestrated training on the MS MARCO benchmark to **reach 0.727 nDCG@10** and improved zero-shot accuracy.
- **Adaptive LLM Gateway:** Built an intelligent LLM gateway that **reduces API costs by ~30%** through complexity-based model routing, caching, intent classification and automated PII redaction.

EDUCATION

M.Sc. in Machine Learning | University of Tübingen, Germany — Oct 2022 - Mar 2026
B.Tech in Electronics and Communication Engineering | Vellore Institute of Technology, India — Jun 2016 - Jul 2020
